McClintock

Charging Forward with Tradition

At McClintock High School, students find purpose in education, value in excellence, and meaning in Charger traditions. Established in 1964, McClintock has a long history of academic and athletic excellence. Our diverse population reflects more than 20 spoken languages. The campus is a neighborhood school, yet conveniently located just minutes from major thoroughfares.

McClintock provides support to incoming freshmen as they make the transition from middle school to high school by placing freshmen on a team with common teachers. Through these efforts, students receive individualized instruction and experience a more nurturing, personalized environment. The team members also, almost naturally, become mentors for students and provide social and emotional support. The development of ninth grade teams has increased student achievement and helped keep students on track for graduation.

Rated a B school by the Arizona Department of Education, we use research-based practices and innovative instruction designed to meet or exceed state and national standards and promote life-long learning.

McClintock students benefit from a comprehensive curriculum that includes standard, honors, advanced placement (AP) and dual enrollment/college credit courses. The Peggy Payne Academy, located on the McClintock campus, is designed for the gifted student who prefers a smaller “school-within-a-school” environment. Students are provided with a rigorous curriculum, career-shadowing opportunities, internships, and a personalized learning environment.

Extra-curricular activities thrive at McClintock and our athletic programs teach students the importance of sportsmanship, hard work and how to be a member of a team. Our clubs and activities give our students a voice and help them find ways to connect with each other and the community. Our fine arts programs have had numerous superior ratings and Chargers have also earned many newspaper, yearbook and art awards.
