

# Take High School **Accounting?**

## DID YOU KNOW...

- The **most popular major at ASU** in 2017 was Business, Management, Marketing, and Related Support Services - 26% of students
- Business, management, marketing, entrepreneurship, and finance majors are **required** to take at least one, usually two, accounting courses
- Many colleges are requiring **non-business majors** to take a course in accounting. For example: Food Service Management, Engineering Management, Construction Management
- Studies show that students who take high school accounting are **more successful** in college accounting
- Students will need to know accounting if they want to **start their own business**. Understanding accounting concepts helps entrepreneurs problem solve and make sound business decisions
- Students will learn personal applications such as **taxes**, banking, payroll, budgeting, and investing

Students in the **two-year accounting program** will

- have exposure to computerized real-world **simulations**
- learn QuickBooks and have the opportunity to become **QuickBooks certified** (at no cost to the student)
- be better prepared for **any** business related major
- acquire **employability skills** – problem solving, critical thinking, organization, accuracy, integrity, business ethics, and technology
- have the opportunity to participate in an accounting **internship** (Year 3)
- have three **dual enrollment** opportunities – Year 1: ACC107 and ACC109, Year 2: ACC115
- earn **honors credit**
- receive **instruction** from an **accounting** and tax **professional** with industry experience
